Jón Agnar Stefánsson

Senior Frontend Web Developer
Iceland

Summary

Web Developer with one decade's worth of experience in popular web technologies and methodologies.

Worked on multiple projects in a wide variety of web frameworks, with a strong focus on project architecture, maintainability, readability, performance optimizations, and strict adherence to best practices.

I have had a passion for technology since a young age and am always interested in ways to improve my skills and knowledge through continuous learning and knowledge-sharing opportunities.

Additionally, other interests include art, culture, language, history, mythology, philosophy, and more.
